# **STANDARD PRACTICE**

## **NATIONAL OCCUPATIONAL SKILLS STANDARD (NOSS) FOR COMMERCIAL VEHICLE AIR CONDITIONING INSTALLATION AND MAINTENANCE LEVEL 3**

### **1. INTRODUCTION**

A commercial vehicle is a type of motor vehicle that is used for transporting goods or passengers. It includes excursion bus, public bus, freight vehicles, etc. Rapid development in tourism industry and logistic industry in Malaysia stimulate demand in commercial vehicles. These scenarios create important job area known as Commercial Vehicle Air Conditioning Installation and Maintenance.

The Commercial Vehicle Air Conditioning Installation and Maintenance (Level 3) personnel who are also known as Commercial Vehicle Air Condition Technician responsible in handling fabrication, electrical wiring and installation of commercial vehicle air conditioning. Besides that, the personnel are required to maintain commercial vehicle air conditioning unit and sub-engine. In addition, the personnel are also responsible to repair the air condition mechanical components and electrical components.

While performing their job, the personnel are required to comply regulatory requirements in conducting refrigerant retrofitting and emission control to protect from refrigerant leaks and direct emission that could harm the environment in accordance with Regulation 3, 4, 5 and 6 of the Environmental Quality (Refrigerant Management) Act 451/2004. The personnel are also required to adhere occupational safety practice when performing their duties.

The Commercial Vehicle Air Conditioning Installation and Maintenance (Level 3) personnel report to the level 4 personnel who give them production job order. The personnel may advance their career up management level.

Career path for this job area is promising due to pace growth of local commercial vehicle as well as rapid growth of automotive industry.

**Authorities and Regulatory bodies:-**

**a. Department of Environment (DOE)**

The Department of Environment has given mandate to promote, enhance and sustain sound environmental management in the process of nation building through Act 127, the Environmental Quality Act 1974 and a few Regulations. The Regulation 51 subsection (p) and (q) mention that any person handling, storing or using oil or mixture containing oil are prohibited to discharges and spillages of oil or mixture containing oil into Malaysian waters. In addition, the Environmental Quality (Refrigerant Management) Regulation 1999 of the Act 127 outlines the handling refrigerant from any refrigeration system, vehicle air-conditioner or any air conditioning.

**b. Department of Occupational Safety and Health (DOSH)**

The department is the regulatory body to regulate The Occupational Safety and Health Act is an Act (Act 541) which provides the legislative framework to secure the safety, health and welfare among all Malaysian workforces and to protect others against risks to safety or health in connection with the activities of persons at work including in the motorcycle assembly factory.

**Pre-requisite**

The entry requirement for this course is with minimum age at 16 years old and must be able to read and write in Bahasa Malaysia.

## **2. OCCUPATIONAL STRUCTURE**

The Commercial Vehicle Air Conditioning Installation and Maintenance (Level 3) falls under the Commercial Vehicle Air conditioning job area and after sales sub sector. Figure 1 illustrates the Occupational Structure, while Figure 2 illustrates Occupational Area Structure of Motorcycle Assembly Operation Level 3

Entry level for this job area is at Level 3 due to their nature of work where generally they work by following instructions and job assignment schedules that is prepared by a superior. The personnel perform a significant range of varied work activities in a variety of context, which most of the tasks are complex and non-routine.

Sector	AUTOMOTIVE INDUSTRY				
Sub Sector	After Sales				
Area	Heavy Commercial Vehicle				
Job Area	Heavy Commercial Vehicle		Commercial Vehicle Air conditioning	Commercial Vehicle Tyre	Coach Building
Level 5	Commercial Vehicle After Sales Manager				Commercial Vehicle Body Building Manager
Level 4	Commercial Vehicle After Sales Executive				Commercial Vehicle Body Building Executive
Level 3	Commercial Vehicle Senior Technician	Commercial Vehicle Service Consultant	<b>Commercial Vehicle Air Conditioning Senior Technician</b>	Commercial Vehicle Tyre Servicing Technician	Commercial Vehicle Body Building Senior Craftsman
Level 2	Commercial Vehicle Technician		<b>Commercial Vehicle Air Conditioning Technician</b>	No Level	Commercial Vehicle Body Building Craftsman
Level 1	Commercial Vehicle Maintenance Technician		No Level	No Level	Commercial Vehicle Body Building Junior Craftsman

Figure1: Occupational Structure for Commercial Vehicle Air Conditioning Installation and Maintenance

Sector	AUTOMOTIVE INDUSTRY			
Sub Sector	After Sales			
Area	Heavy Commercial Vehicle			
Job Area	Heavy Commercial Vehicle	Commercial Vehicle Air conditioning	Tyre	Coach Building
Level 5	Commercial Vehicle After Sales Management			Commercial Vehicle Body Building Management
Level 4	Commercial Vehicle After Sales Management			Commercial Vehicle Body Building Management
Level 3	Commercial Vehicle Servicing & Maintenance	<b>Commercial Vehicle Air Conditioning Installation and Maintenance</b>	Commercial Vehicle Tyre Servicing & Maintenance	Commercial Vehicle Body Building Operation
Level 2	Commercial Vehicle Servicing & Maintenance	Embedded to level 3	No Level	No Level
Level 1	Commercial Vehicle Maintenance Technician	No Level	No Level	No Level

Figure 2: Occupational Area Structure for Commercial Vehicle Air Conditioning Installation and Maintenance

### 3. DEFINITION OF COMPETENCY LEVEL

The NOSS is developed for various occupational areas. Candidates for certification must be assessed and trained at certain levels to substantiate competencies. Below is a guideline of each NOSS Level as defined by the Department of Skills Development, Ministry of Human Resources Malaysia.

Malaysia Skills Certificate : Competent in performing a range of varied work  
Level 1 activities, most of which are routine and predictable

Malaysia Skills Certificate : Competent in performing a significant range of  
Level 2 varied work activities, performed in a variety of contexts. Some of the activities are non-routine and required individual responsibility and autonomy.

Malaysia Skills Certificate : Competent in performing a broad range of varied  
Level 3 work activities, performed in a variety of contexts, most of which are complex and non-routine. There is considerable responsibility and autonomy, and control or guidance of others is often required.

Malaysia Skills Diploma : Competent in performing a broad range of  
Level 4 complex technical or professional work activities, performed in a variety of contexts, and with substantial degree of personal responsibility and autonomy. Responsibility for the work of others and allocation of resources is often present.

Malaysia Skills Advanced : Competent in applying a significant range of  
Diploma Level 5 fundamental principles and complex techniques across a wide and often unpredictable variety of contexts. Very substantial personal autonomy and often significant responsibility for the work of others and for the allocation of substantial resources features strongly, as do personal accountabilities for analysis, diagnosis, planning, execution and evaluation.

#### **4. MALAYSIAN SKILL CERTIFICATION**

The candidate after being assessed, verified and fulfilled Sijil Kemahiran Malaysian requirements shall be awarded Sijil Kemahiran Malaysia (SKM) – Level 3 in Commercial Vehicle Air Conditioning Installation and Maintenance

#### **5. JOB COMPETENCIES**

Core competencies for Commercial Vehicle Air Conditioning Installation and Maintenance Level 3 are:

- i. Commercial Vehicle Air Conditioning Fitting Parts Fabrication
- ii. Commercial Vehicle Air Conditioning Sub- Wire Harness Fabrication
- iii. Commercial Vehicle Air Conditioning Unit Installation
- iv. Commercial Vehicle Air Conditioning Maintenance
- v. Commercial Vehicle Air Conditioning Mechanical Components Repair
- vi. Commercial Vehicle Air Conditioning Electrical Components Repair
- vii. Commercial Vehicle Air Conditioning Workshop Administration And Supervision

The elective competency unit for Commercial Vehicle Air Conditioning Installation Maintenance Level 3 is:

- i. Commercial Vehicle Sub-Engine Servicing

#### **6. WORKING CONDITIONS**

The Commercial Vehicle Air Conditioning Installation and Maintenance (Level 3) personnel generally work under similar operating hours of the organisation / company. Sometimes they may have to work beyond the normal hours including on weekends to meet project deadlines. They are required to comply with Department of Environmental regulation regarding waste storage, waste handling and waste disposal.

While performing their duties, they are regularly exposed to fumes or airborne particles, toxic or caustic chemicals and risk of electrical shock. They are frequently exposed to wet and/or humid conditions, and working near moving mechanical parts and machinery, which can be a potential hazard if being mishandled. Moreover, they are occasionally exposed to vibration and noisy environment. It is therefore, very important for all personnel to ensure that the health and safety requirements are being followed at all times.

In addition, they need to be able to work both independently and as part of a team and be able to work well under pressure. Ideally, they should possess problem-solving ability and good communication skills for dealing with customer and colleagues.

## **7. EMPLOYMENT PROSPECTS**

The Commercial Vehicle Air Conditioning Installation and Maintenance (Level 3) personnel are employed by commercial vehicle services centres and after sales service workshops. Besides that they are also have brighter job opportunities in other job areas of automotive industry and other industries.

Other related occupations with respect to employment opportunities are:

- Motor vehicle technician
- Service advisor

Other related industries /job area with respect to employment opportunities are:

- Motor vehicle workshop
- Motor vehicle service centre

## **8. TRAINING INDUSTRIAL/PROFESSIONAL RECOGNITION, OTHER QUALIFICATIONS AND ADVANCEMENT**

### **8.1 Training:-**

Currently, there is no standard reference of professional qualification with respect to this particular job area. As per career advancement, most competent commercial vehicle air conditioning installation and maintenance personnel learn their competency on the job. They usually begin as qualified Commercial Vehicle Air Conditioning Technician and gradually learn their skills as they gain experience for career advancement.

### **8.2 Industrial / Professional Recognition:-**

Currently, there is no standard reference of professional recognition is given with respect to this job area.

## **10. ACKNOWLEDGEMENT**

The Director General of DSD would like to extend his gratitude to the organizations and individuals who have been involved in developing this standard.

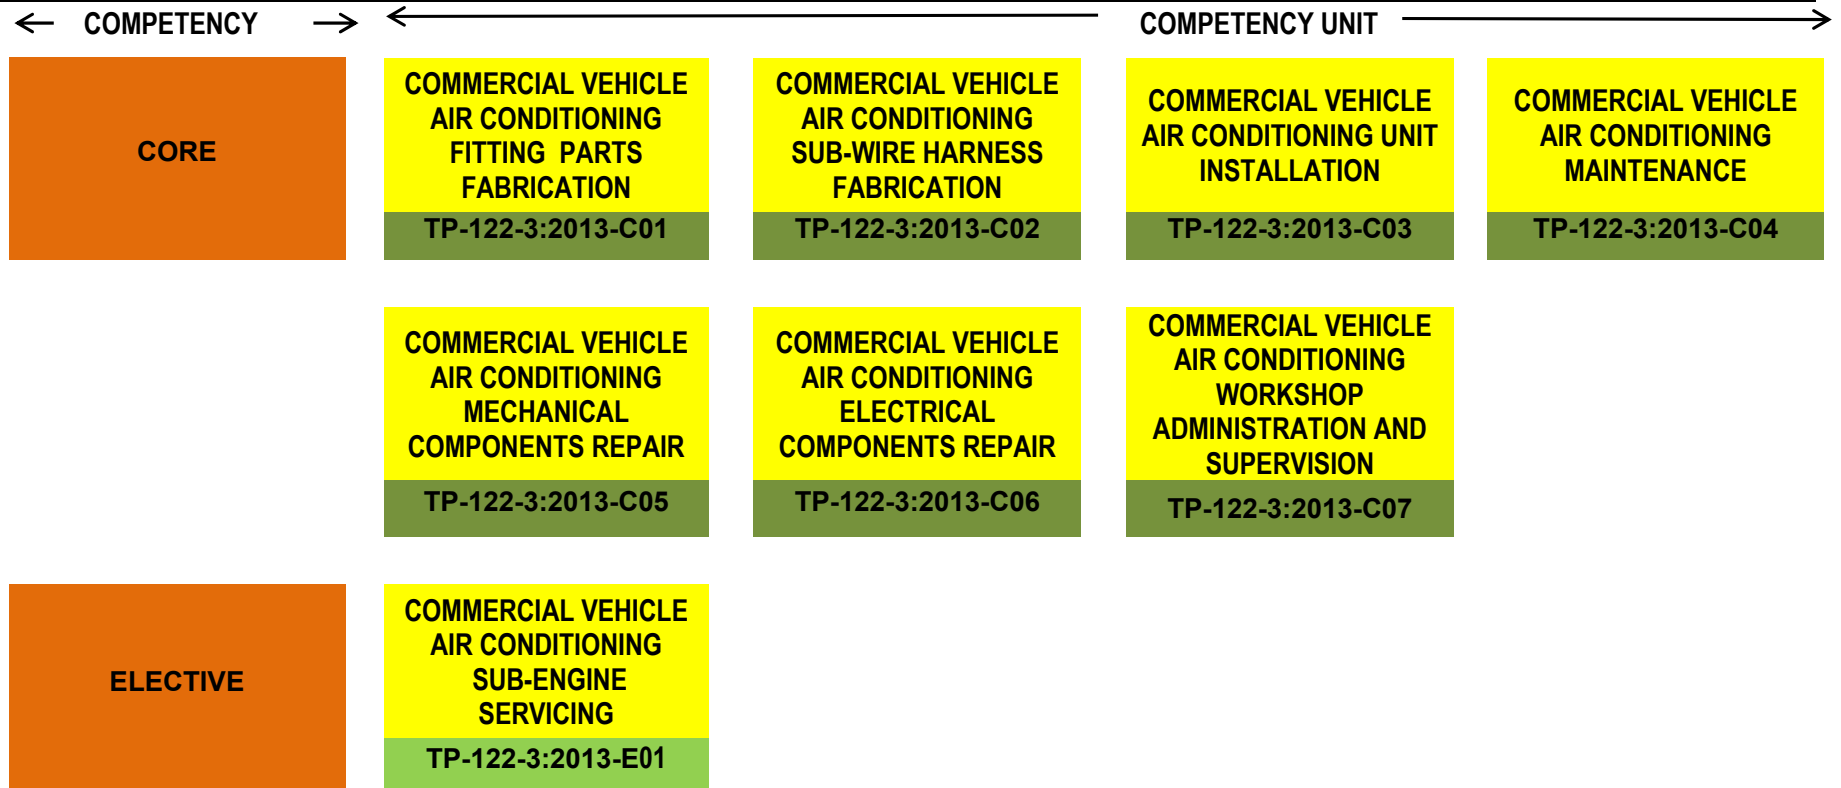

## 11. NOSS DEVELOPMENT COMMITTEE MEMBERS

### THE COMMERCIAL VEHICLE AIR CONDITIONING INSTALLATION DAN MAINTENANCE LEVEL 3

<b>PANEL OF EXPERTS</b>		
1.	Azman Bin Mohd Said	Manager TKR Sdn. Bhd.
2.	Hasbi Mat Hassan	Executive Denso (M) Sdn Bhd
3.	Mohd Khairulakmal Bin Ridzuan	Supervisor Fire Fighting and Rescue Department
4.	Osman Md Said	Senior Manager West Starr Maxux Sdn. Bhd.
5.	Razman Bin Sabtu	Senior Technician Department of Public Work (JKR)
6.	Ridzwan bin Baharin	Senior Manager Weststar Maxus Distributor Sdn. Bhd.
7.	Shamsul Ahmad Bin Yusof	Senior Manager Volvo Heavy Service Centre, Glenmarie
8.	Yuvarajah A/L Parameswaran	Manager Pam Global
<b>FACILITATOR</b>		
9.	Isvaran a/l P.Ramasamy	Portray Sdn. Bhd.
<b>CO-FACILITATOR</b>		
10.	Jaiyah Binti Shahbudin	Portray Sdn. Bhd.

<b>Sub Sector</b>	<b>AFTER SALES SERVICES</b>						
<b>Job Area</b>	<b>COMMERCIAL VEHICLE AIR CONDITIONING</b>						
<b>NOSS Title</b>	<b>COMMERCIAL VEHICLE AIR CONDITIONING INSTALLATION AND MAINTENANCE</b>						
<b>Competency Unit Title</b>	<b>COMMERCIAL VEHICLE AIR-CONDITIONING SUB-WIRE HARNESS FABRICATION</b>						
<b>Learning Outcomes</b>	<p>The outcome of this competency is to produce a sub-wire harness for commercial vehicle air conditioning that is safe and comply with regulatory body regulation. Upon completion of this competency unit, trainees will be able to:</p> <ul style="list-style-type: none"> <li>• Organize sub-wire harness fabrication tools and materials</li> <li>• Fabricate air conditioning sub-wire harness</li> <li>• Carry out air conditioning sub-wire harness 'pre-installation' functionality test</li> </ul>						
<b>Competency Unit ID</b>	<b>TP-122-3:2013-C02</b>	<b>Level</b>	<b>3</b>	<b>Training Duration</b>	<b>180</b>	<b>Credit Hours</b>	<b>18</b>
<b>Work Activities</b>	<b>Related Knowledge</b>	<b>Related Skills</b>	<b>Attitude / Safety / Environment</b>	<b>Training Hours</b>	<b>Delivery Mode</b>	<b>Assessment Criteria</b>	
1. Organize sub-wire harness fabrication tools and materials	<ul style="list-style-type: none"> <li>i. Introduction of air conditioning Electrical wiring diagram and symbol</li> <li>ii. Type, size, colour code and length of wire specification</li> <li>iii. Type and usage of wire connector</li> <li>iv. Type and size of Spiral conduit specification,</li> <li>v. Types and function of wire fabrication tools and equipment, such</li> </ul>			10 hours	Lecture & Group discussion	<ul style="list-style-type: none"> <li>i. Electrical wiring diagram interpreted</li> <li>ii. Wire specification and spiral conduit determined in according with air conditioning wiring diagram</li> <li>iii. Sub-wire harness fabrication tools determined and operated in</li> </ul>	

Work Activities	Related Knowledge	Related Skills	Attitude / Safety / Environment	Training Hours	Delivery Mode	Assessment Criteria
	<p>as:</p> <ul style="list-style-type: none"> <li>• Wire striper</li> <li>• Wire cutter</li> <li>• Soldering iron set</li> <li>• Multi meter</li> <li>• Ampere meter</li> <li>• Wire terminal clamping tools</li> </ul> <p>vi. Types and usage of sub-wire harness fabrication materials, such as:</p> <ul style="list-style-type: none"> <li>• Wire tape</li> <li>• Wire socket terminal</li> <li>• Cable tie</li> </ul> <p>vii. Sub-wire harness fabrication job order contents</p> <ul style="list-style-type: none"> <li>• Installation Date</li> <li>• Vehicle Model</li> <li>• Chassis number</li> <li>• Engine number</li> <li>• Commercial vehicle air conditioning electrical drawing</li> </ul>					<p>according with manufacturer's operation manual</p>

Work Activities	Related Knowledge	Related Skills	Attitude / Safety / Environment	Training Hours	Delivery Mode	Assessment Criteria
		<ul style="list-style-type: none"> <li>i. Interpret air conditioning sub-wire harness fabrication job order contents</li> <li>ii. Interpret electrical wiring diagram</li> <li>iii. Determine wire and spiral conduit specification</li> <li>iv. Select and operate wire fabrication tools</li> </ul>	<p><u>Attitude:</u></p> <ul style="list-style-type: none"> <li>i. Accuracy in interpreting wiring diagram</li> <li>ii. Thorough in determine sub-wire harness specification</li> </ul>	20 hours	Demonstration Group Discussion and practical	

Work Activities	Related Knowledge	Related Skills	Attitude / Safety / Environment	Training Hours	Delivery Mode	Assessment Criteria
			iii. Detail in determining types of installation tools, equipment and testing devices  <u>Safety/Environment:</u> i. Safety caution when planning electrical fabrication works			
2. Fabricate air conditioning sub-wire harness	i. Wire fabrication method <ul style="list-style-type: none"> <li>• Cutting process</li> <li>• Joining process</li> <li>• Wire insulation process</li> </ul> ii. Wire cutting procedure iii. Wire laying procedure iv. Types of wire joining method <ul style="list-style-type: none"> <li>• Stripping process</li> <li>• Crimping process</li> <li>• Soldering process</li> </ul>			35 hours	Lecture & Group discussion	i. Air conditioning wiring routing determined in accordance with electrical wiring drawing ii. Wire cut to length in accordance with air conditioning electrical wiring drawing iii. Wire assembled according to wiring diagram

Work Activities	Related Knowledge	Related Skills	Attitude / Safety / Environment	Training Hours	Delivery Mode	Assessment Criteria
	v. Wire assembled and spiral conduit binding procedure	<ul style="list-style-type: none"> <li>i. Measure and cut wire based on vehicle body length</li> <li>ii. Lay wire based on wiring diagram</li> <li>iii. Carry out wire stripping works</li> <li>iv. Carry out wire crimping works</li> <li>v. Carry out wire soldering works</li> <li>vi. Carry out wire insulation</li> <li>vii. Wire assembling work</li> <li>viii. Spiral conduit binding technique</li> <li>ix. Connect wire to socket terminal</li> </ul>	<p><u>Attitude:</u></p> <ul style="list-style-type: none"> <li>i. Accurate when cutting the wire</li> <li>ii. Careful when laying wire and assemble spiral conduit</li> </ul>	85 hours	Demonstration Practical or Project	iv. Wire bonded in Spiral conduit in according with wiring drawing

Work Activities	Related Knowledge	Related Skills	Attitude / Safety / Environment	Training Hours	Delivery Mode	Assessment Criteria
			iii. Detail and safety conscious when fabricating sub-wire harness  <u>Safety/Environment:</u> i. Safety cautions when carrying sub-wire harness fabrication works ii. Adhere to Workshop Practice			
3. Carry out air conditioning sub-wire harness 'pre-installation' functionality test	i. Introduction of Ohm law ii. Types of sub-wire harness functionality test: <ul style="list-style-type: none"> <li>• Wire resistance retesting procedure</li> <li>• Wire voltage testing procedure</li> <li>• Wire continuity testing procedure</li> </ul> i. <i>Work Hazard related to electrical work, such as:</i> <ul style="list-style-type: none"> <li>• <i>High voltage</i></li> </ul>			10 hours	Lecture & Group discussion	i. Ohm Law described ii. Wire resistance tested in according with service manual iii. Wire voltage tested in according with service manual iv. Wire continuity tested in according with service manual v. Wire connector

Work Activities	Related Knowledge	Related Skills	Attitude / Safety / Environment	Training Hours	Delivery Mode	Assessment Criteria
	ii. <i>Workplace risk control, such as:</i> <ul style="list-style-type: none"> <li>• <i>Usage of PPE</i></li> <li>• <i>Workplace safety procedure</i></li> </ul>					tested in according with service manual
		i. Check wire harness terminal and socket ii. Conduct wire resistance test iii. Conduct wire voltage test iv. Conduct wire continuity test v. Conduct wire connector test	<u>Attitude:</u> i. Detail in conducting wire resistance test and wire voltage test  ii. Accurate in interpreting test result	20 hours	Demonstration & Project	

Work Activities	Related Knowledge	Related Skills	Attitude / Safety / Environment	Training Hours	Delivery Mode	Assessment Criteria
			<u>Safety/Environment:</u> i. Adhere to safety procedure when conducting testing and commissioning

	refrigerant v. Types and function of air conditioning unit replaceable / serviceable spare parts, such as: <ul style="list-style-type: none"> <li>• Drier</li> <li>• Pollen filter</li> <li>• Cabin air filter</li> <li>• Suction &amp; discharge flexible hoses</li> <li>• O-ring</li> <li>• Expansion valve</li> <li>• V-Belt</li> <li>• V-Belt tensioner</li> </ul>					
		i. Interpret commercial vehicle air conditioning maintenance job order contents ii. Select commercial vehicle air conditioning maintenance tools and equipment iii. Select commercial vehicle air conditioning maintenance materials iv. Prepare air		23 hours	Demonstration & practical	

Work Activities	Related Knowledge	Related Skills	Attitude / Safety / Environment	Training Hours	Delivery Mode	Assessment Criteria
		conditioning unit replaceable / serviceable spare parts	<u>Attitude:</u> i. Detail when interpret maintenance job order contents ii. Analytical mind when interpreting commercial vehicle air conditioning previous maintenance record iii. Rational in selecting maintenance tools and equipment v. Precise in determine required replaceable spare parts			

Work Activities	Related Knowledge	Related Skills	Attitude / Safety / Environment	Training Hours	Delivery Mode	Assessment Criteria
			<u>Safety/Environment:</u> i. Adhere to workplace housekeeping practice when preparing tools, equipment and materials.			
2. Carry out "Compressor Drive System" (CDS) maintenance	i. Type and function of compressor drive system (CDS) components <ul style="list-style-type: none"> <li>• Compressor drive system</li> <li>• Compressor service valve</li> <li>• Magnetic clutch</li> <li>• Shaft seal</li> </ul> ii. Compressor Drive System (CDS) maintenance procedure iii. Type and specification of air conditioning <ul style="list-style-type: none"> <li>• compressor oil</li> <li>• air conditioning belting</li> </ul> iv. Manifold gauge set operating procedure			10 hours	Lecture & Group discussion	i. Air conditioning compressor service valve closed in according with servicing manual ii. Compressor refrigerant evacuated in according with service manual iii. Compressor oil replaced in according with manufacturer's specification iv. Compressor shaft seal replaced in according with repair manual v. Air conditioning

Work Activities	Related Knowledge	Related Skills	Attitude / Safety / Environment	Training Hours	Delivery Mode	Assessment Criteria
	v. Air conditioning recover, recycle and charging equipment operating procedure vi. Compressor shaft seal replacing procedure vii. Belting adjustment procedure					compressor vacuumed in according with service manual vi. Air conditioning compressor refrigerant top up in according with manufacturer's specification
		i. Close Compressor service valve ii. Connect and operate manifold gauge set / Recovery, recycle and recharge unit iii. Evacuate refrigerant in the compressor iv. Replace air conditioning compressor oil v. Replace compressor shaft seal vi. Vacuum air conditioning compressor vii. Top up Air conditioning compressor refrigerant viii. Re-open compressor unit service valve		40 hours	Demonstration Practical or Project	vii. Air conditioning compressor service valve re-open in according with service manual viii. Compressor belt removed and replaced according to service manual ix. Belt tension adjusted in according with manufacturer's specification

Work Activities	Related Knowledge	Related Skills	Attitude / Safety / Environment	Training Hours	Delivery Mode	Assessment Criteria
		ix. Remove and replace compressor belting x. Adjust belt tension	<p><u>Attitude:</u></p> <ul style="list-style-type: none"> <li>i. Thorough when inspecting “Compressor Drive System” (CDS) components and parts condition</li> <li>ii. Careful when performing maintenance works</li> <li>iii. Meticulous when troubleshooting and rectifying components abnormalities</li> </ul> <p><u>Safety/Environment:</u></p> <ul style="list-style-type: none"> <li>i. Adhere to safety procedure when carrying out maintenance works</li> </ul>			

Work Activities	Related Knowledge	Related Skills	Attitude / Safety / Environment	Training Hours	Delivery Mode	Assessment Criteria
			ii. Adhere to work area ergonomics practice when executing job			
3. Carry out evaporator unit assembly maintenance	i. Type and function of air conditioning evaporator assembly's components: <ul style="list-style-type: none"> <li>• Evaporator blower motor</li> <li>• Evaporator air filter</li> <li>• Evaporator coils</li> <li>• Thermal expansion valve</li> <li>• Liquid line solenoid valve</li> <li>• Drain port / hose</li> </ul> ii. Evaporator air filter cleaning / replacement procedure iii. Evaporator blower cleaning procedure iv. Evaporator coils assembly cleaning procedure v. Evaporator blower air flow specification			10 hours	Lecture	i. Types of evaporator assembly components listed out and described ii. Evaporator Air filter cleaned or replaced according to service manual iii. Evaporator blower inspected and cleaned in according to service manual iv. Evaporator coils assembly inspected and cleaned according to service manual v. Evaporator blower air flow tested in

Work Activities	Related Knowledge	Related Skills	Attitude / Safety / Environment	Training Hours	Delivery Mode	Assessment Criteria

## CURRICULUM of COMPETENCY UNIT (CoCU)

<b>Sub Sector</b>	<b>AFTER SALES SERVICES</b>						
<b>Job Area</b>	<b>COMMERCIAL VEHICLE AIR CONDITIONING</b>						
<b>NOSS Title</b>	<b>COMMERCIAL VEHICLE AIR CONDITIONING INSTALLATION AND MAINTENANCE</b>						
<b>Competency Unit Title</b>	<b>COMMERCIAL VEHICLE AIR-CONDITIONING SUB-ENGINE SEVICING</b>						
<b>Learning Outcomes</b>	<p>The outcome of this competency is to produce excellent condition of the sub-engine in term of performance and functionality to power the air conditioning unit. The ultimate goal is to provide cold and comfort environment to passengers. Upon completion of this competency unit, trainees will be able to:</p> <ul style="list-style-type: none"> <li>• Prepare sub-engine servicing tools, equipment and materials</li> <li>• Service sub-engine lubrication</li> <li>• Service sub-engine cooling system</li> <li>• Service sub-engine fuel system components</li> <li>• Service sub-engine electrical components</li> </ul>						
<b>Competency Unit ID</b>	<b>TP-122-3:2013-E01</b>	<b>Level</b>	3	<b>Training Duration</b>	220	<b>Credit Hours</b>	22
<b>Work Activities</b>	<b>Related Knowledge</b>	<b>Related Skills</b>	<b>Attitude / Safety / Environment</b>	<b>Training Hours</b>	<b>Delivery Mode</b>	<b>Assessment Criteria</b>	
1. Prepare sub-engine servicing tools, equipment and materials	i. Types and function of sub-engine parts to be serviced <ul style="list-style-type: none"> <li>• Sub-engine lubrication system</li> <li>• Sub-engine cooling system</li> <li>• Sub-engine fuel system</li> <li>• Sub-engine electrical</li> </ul>			7 hours	Lecture & Group discussion	i. Servicing tools and equipment listed out and describe ii. Service parts prepared in according with Job order iii. Materials and consumable prepared in

SUMMARY OF TRAINING DURATION

**TP-122-3-2013 (COMMERCIAL VEHICLE AIR CONDITIONING INSTALLATION AND MAINTENANCE)**

<b>NO.</b>	<b>COMPETENCY UNIT TITLE</b>	<b>WORK ACTIVITIES</b>	<b>RELATED KNOWLEDGE</b>	<b>APPLIED SKILLS</b>	<b>HOURS</b>	<b>TOTAL (Hours)</b>
1	<b>COMMERCIAL VEHICLE AIR-CONDITIONING FITTING PARTS FABRICATION</b>	1. Organize air conditioning fitting parts fabrication tools, equipment and materials	10	20	30	230
		2. Fabricate air conditioning compressor bracket	15	45	60	
		3. Fabricate air conditioning ducting	20	60	80	
		4. Fabricate air conditioning piping	15	45	60	
2	<b>COMMERCIAL VEHICLE AIR-CONDITIONING SUB-WIRE HARNESS FABRICATION</b>	1. Organize sub-wire harness fabrication tools and materials	10	20	30	180
		2. Fabricate air conditioning sub-wire harness	35	85	120	
		3. Carry out air conditioning sub-wire harness 'pre-installation' functionality test	10	20	30	
3	<b>COMMERCIAL VEHICLE AIR-CONDITIONING UNIT INSTALLATION</b>	1. Organize air conditioning unit installation tools, equipment and materials	10	30	40	335
		2. Install air conditioning unit mechanical parts	40	110	150	
		3. Install air conditioning sub-wire harness and electrical parts	75	5	80	
		4. Perform air conditioning refrigerant system charging	15	10	25	

		5. Carry out air conditioning unit testing and commissioning	10	30	40	
4	<b>COMMERCIAL VEHICLE AIR-CONDITIONING MAINTENANCE</b>	1. Organise commercial vehicle air conditioning maintenance	7	23	30	220
		2. Carry out "Compressor Drive System" (CDS) maintenance	10	40	50	
		3. Carry out cooling unit system maintenance	10	40	50	
		4. Carry out condensing unit system maintenance	10	40	50	
		5. Carry out air conditioning refrigerant cycle system maintenance	10	30	40	
5	<b>COMMERCIAL VEHICLE AIR CONDITIONING MECHANICAL COMPONENTS REPAIR</b>	1. Perform commercial vehicle air conditioning troubleshooting	7	3	10	340
		2. Repair compressor magnetic clutch	15	45	60	
		3. Overhaul air conditioning compressor unit	15	45	60	
		4. Repair cooling unit	15	45	60	
		5. Repair condenser unit	15	45	60	
		6. Repair air conditioning refrigerant cycle system	15	45	60	
		7. Carry out conditioning mechanical performance test	8	22	30	

6	<b>COMMERCIAL VEHICLE AIR CONDITIONING ELECTRICAL COMPONENTS REPAIR</b>	1. Carry out air conditioning electrical components troubleshooting	15	25	40	230
		2. Carry out air conditioning electrical components rectification works	35	105	140	
		3. Perform air conditioning electrical components functionality test	10	40	50	
7	<b>COMMERCIAL VEHICLE AIR CONDITIONING WORKSHOP ADMINISTRATION AND SUPERVISION</b>	1. Carry out customer service related activities	20	20	40	130
		2. Supervise subordinate	20	25	45	
		3. Monitor workplace safety, health and environment practices	20	25	45	
<b>TOTAL HOURS (CORE Competencies)</b>			<b>522</b>	<b>1143</b>	<b>1665</b>	

1	<b>COMMERCIAL VEHICLE AIR- CONDITIONING SUB-ENGINE SEVICING</b>	1. Prepare sub- engine servicing tools, equipment and materials	7	12	19	219
		2. Service sub- engine lubrication	7	23	30	
		3. Service sub- engine cooling system	15	35	50	
		4. Service sub- engine fuel system components	15	45	60	
		5. Service sub- engine electrical components	15	45	60
